ABOUT ME

Web Developer specialized in React.js and modern web application development.

Strong experience in JavaScript and CSS for building responsive and user-friendly interfaces.

Skilled in designing and developing complete systems with clean and scalable code.

Passionate about performance, usability, and continuous learning in web technologies

EDUCATION

Self-Taught Web Developer

Learned web development through self-study, online courses, documentation, and hands-on projects.

Continuously improving skills in JavaScript, CSS, and React.js.

WORK EXPERIENCE

Custom Management Systems – Self Projects

Developed complete web-based management systems focusing on real-world use cases.

- Bakery Management System:

Designed and built a system to manage daily operations including products, orders, and records.

Focused on simplicity, fast data entry, and clear user interface for non-technical users.

- Exam & Question Management System:

Developed a web application for creating exams, managing questions, entering student grades, and viewing results.

Implemented a clean workflow for teachers to generate exams, manage data, and track student performance efficiently.

Built responsive user interfaces using React.js, JavaScript, and CSS.

Emphasized clean code structure, scalability, and user-friendly design.
